

LAX INTERMODAL TRANSPORTATION FACILITY - WEST (ITF-WEST)

QUICK FACTS

The Intermodal Transportation Facility – West (ITF-West) parking structure & mobility hub will provide travelers with convenient access to LAX without needing to enter the Central Terminal Area. Following construction completion in 2021, a free shuttle will provide direct access to the terminal. In 2023, the ITF-West Parking Structure will be directly connected to the new Automated People Mover (APM) train system via two pedestrian bridges. It will then reach its full vision to create a mobility hub where passengers can be dropped off, picked up, or park and ride the APM directly to the terminals.

LOCATION	Between Westchester Parkway and 96th Street
CONSTRUCTION SCHEDULE	Construction began in 2019; Operational in 2021
CONSTRUCTION VALUE	\$219 million
JOB CREATION	250 estimated construction jobs
PARKING STALLS	Approximately 4,300 parking stalls
FEATURES & AMENITIES	Long and short term parking options, meet and greet space, valet parking, smart parking features, and enhanced pedestrian walkways

LEGEND

- Automated People Mover
- Metro Crenshaw/LAX Line
- Metro Green Line
- Intermodal Transportation Facility West
- Consolidated Rent-A-Car Facility
- Automated People Mover Station
- Metro Crenshaw/LAX Line Station
- Metro Crenshaw/LAX Station

Opening in 2021, the Intermodal Transportation Facility - West (ITF-West) will be the first component completed as part of LAX’s \$5.5-billion Landside Access Modernization Program (LAMP). The LAMP consists of five major components: the Consolidated Rent-A-Car (ConRAC) facility, the Automated People Mover (APM) train system, the ITF-West parking structure, connection to Metro via the future Airport Metro Connector (AMC) Station, and roadway improvements throughout the LAX area.

TECHNOLOGY

Special attention will be given to vehicular circulation with pick up and drop off areas within the facility. A parking guidance system featuring the latest smart parking technology will aid users in finding an open space.

SUSTAINABILITY

The project includes electric vehicle (EV) charging stations, drought tolerant landscaping, energy-saving LED light controls and reserved parking for low emitting vehicles and carpools.

BENEFITS TO LAX EMPLOYEES

The ITF-West will also provide much greater convenience to the more than 55,000 LAX badged employees with the new 26,000-square-foot Security Badging Office, which will be accessible using the APM in 2023.
