

NOTICE OF FINDING OF NO SIGNIFICANT IMPACT

The Federal Aviation Administration has announced that a Finding of No Significant Impact (FONSI) has been approved based upon results of a Final Environmental Assessment (EA) prepared in June 2019 for the proposed electrical Receiving Station "X" (RS-X) project at Los Angeles International Airport, Los Angeles, Los Angeles County, California.

The following projects are addressed by the FONSI:

- The Proposed Action would include the installation of a new RS-X, generally comprised of a Los Angeles Department of Water and Power (LADWP) control room, transmission feeders to the 230 kilovolt (kV) LADWP transmission lines and electrical vaults along Pershing Drive, and distribution feeders from RS-X to LAX at the northwest corner of LAX near the intersection of Westchester Parkway and Pershing Drive.
- The LADWP control room at the RS-X would be a concrete and masonry, single-story control room building with a footprint of approximately 4,800 square feet.
- The RS-X would also include outdoor electrical equipment, occupying approximately 22,800 and 63,400 square feet, to the west and east of the LADWP control room, respectively.
- The height of the outdoor equipment would not exceed 65 feet. The site would be excavated to an approximate depth of 30 feet, limiting the height of equipment to 35 feet above existing grade.
- The RS-X would be fed by the 230 kV LADWP transmission lines connecting the Scattergood Generating Station (SGS) and Receiving Station "K," (RS-K) located on the west side of LAX along Pershing Drive.
- The new RS-X would be a purpose-built structure, designed to accommodate 160-megavolt amperes (MVA) redundant capacity.
- New utility connections to existing storm and wastewater drains, natural gas, communications, and other related utility services would be required to support the operations of the proposed RS-X.

The FONSI indicates that the Proposed Action is consistent with existing environmental policies and objectives as set forth in the National Environmental Policy Act of 1969 in that it will not significantly affect the quality of the human environment.

Copies of the FONSI and Final EA are available online at <https://www.lawa.org/en/lawa-our-lax> under "Environmental Documents, Documents Underway" or for public inspection at the following locations:
